

ReComS Group acquires Accupharma

March 29, 2005

As part of the commitment to continue enhancing its compliance, resources/business management, security, and legal consulting portfolio of services in Puerto Rico, US and Latin America, **Regulatory Compliance Services, Corp. (ReComS)** has acquired Accupharma Research & Scientific Consulting, Inc. (Accupharma) located in Humacao, Puerto Rico. Accupharma is known for its analytical and microbiological product testing and cleaning methods development services for the pharmaceutical industry.

“We have seen the trend in the food, drug, cosmetic and healthcare related companies located in Puerto Rico in sending their product testing requirements to the States. During the last year, we have studied the market as well as identified its potential, and have found that customers are looking for local alternatives that can provide such kind of services. We have the resources in the Island with the EXPERIENCE that can perform these tests at a VERY competitive price, with results at a FAST response time”, said Mr. Eric R. Olivieri, ReComS President, Chairman and CEO. QUALITY and CONSISTENT

With the acquisition of Accupharma, our companies continue to expand its variety of services, fulfilling those local needs and becoming the local alternative of product testing to many organizations, everything under one roof. Sending sensitive product samples to the States for testing via airmail may take as much as 4 days since air carriers usually do not provide services during the weekend. Also, when there are problems with the testing of a product, resources from the customer have to travel abroad to evaluate the situation, incurring in additional cost and loss of valuable time to their company. Accupharma will be enhanced with an organization that can provide the services every day of the week, picking the samples at the company’s doorstep and being as close as a 2-hour drive from any place in the Island”, added Mr. Olivieri.

ReComS is the first local regulatory compliance, legal consulting, resources and business management Service Company in the Island. Its mission has been to offer the best possible service to our customers with competitive prices in a very demanding and sophisticated industry. The NEW Accupharma will be providing the following services:

- +Samples pick-up at you company’s location
- +7 days-testing services
- +Media Preparation
- +Analytical and Microbiological Product Testing
- +Cleaning Methods Development and Validation
- +Environmental and Cleaning Samples Testing
- +R/M Testing Against USP, EP, BP, JP, ICH requirements
- +In-Process and Finished Product testing against company requirements
